

New Zealand Energy Excellence Awards

August 30, 2023

Congratulations to the team at Northpower, deserving winners of the Social Procurement award at last night's New Zealand Energy Excellence Awards ceremony in Christchurch.

BlueFloat Energy New Zealand and Elemental Group Limited are super proud to have sponsored this new award category which recognizes the kiwi companies doing it best when it comes to delivering environmental social and economic benefits through procurement.

Northpower was awarded top marks for its efforts with local firms, including drilling contractor North Drill and the Developers Institute, to build the local workforce and develop hard to access skills for the benefit of the region.

Congratulations also to fellow finalists Electricity Retailers' Association (ERANZ) and solarZero for their compelling entries and to everyone who submitted for the Social Procurement Award. Together we are raising the bar for social procurement, developing policies and initiatives that consciously give back to our communities. Ka rawe!

And one final highlight for the evening – Energy Minister, Megan Woods asking all of the wāhine ma in the room to join her on stage to celebrate Woman in Energy. Tu meke!
