

BlueFloat Energy and Elemental Group sign up to the Procure Taranaki Charter

March 3, 2023

BlueFloat Energy New Zealand and our partner Elemental Group Limited are proud to sign up to the Procure Taranaki Charter demonstrating our commitment to benefiting local economies and communities through local and social procurement.

As we develop our South Taranaki and Waikato offshore wind projects our aim is to prioritise local procurement throughout the supply chain and working with Venture Taranaki, Te Waka and Tātaki Auckland Unlimited to find the best regional opportunities that will create enduring benefits and sustainable economic growth.

At BlueFloat Energy, we are passionate about offshore wind as a key enabler of the energy transition. New Zealand has amongst the best offshore wind in the world and we are super excited to help Aotearoa to decarbonise and to create a new source of green energy.

Our thanks to Brian Crockett from ETC (Engineering Taranaki Consortium) for hosting Partnerships Director, Justine Gilliland at the signing today. Brian was instrumental in setting up the Charter and signing up over 25 local companies and organisations representing several thousand people across Taranaki.
